

INCIDENT MANAGEMENT SITUATION REPORT
 THURSDAY, MAY 8, 1997 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL I

CURRENT SITUATION: The Southwest and Southern California Areas experienced increased fire activity yesterday. Several units in those areas continue to record high to extreme fire indices.

Southwest Area Large Fires:

BONITA PARK, Chiricahua NP. No other information reported.

OUTLOOK: A high pressure system over Florida continues to bring partly cloudy skies and high temperatures in the 80's. A ridge of high pressure remains over southern California, with sunshine across the area. A weak upper trough and surface front will move into New Mexico. Partly cloudy conditions with scattered showers and thunderstorms will dominate northeastern New Mexico. Arizona will be partly cloudy and breezy with a chance of dry thunderstorms in the far north. High temperatures for the south western states will range from the 60's and 70's in the mountains to the 90's and near 100 in the southern deserts. A low pressure system and cold front will move into Michigan, causing scattered showers and thunderstorms, windy conditions and cooler temperatures. Highs for the Great Lakes states will reach into the upper 40's in the north to the 60's in the south.
